Linda O'Leary, Henderson
Karen White, Louisville
Melanie Tyner-Wilson, Lexington

YOUTH ADVISORY COUNCIL

The OCSHCN Youth Advisory Council, also referred to as "Young Adults with Power," is comprised of youth with special health care needs between the ages of 14 and 25. The council currently has representatives from Ashland, Lexington, and Louisville.

WHO WE ARE

The Office for Children with Special Health Care Needs (OCSHCN) is a Title V agency that is part of the Kentucky Cabinet for Health and Family Services. OCSHCN has a 95-year history of providing care to children across the state with special health care needs. Services take place within a OCSHCN office, a contracted physician's office, families home, or at a partner location.

MISSION

To enhance the quality of life for Kentucky's children with special health care needs through quality service, leadership, advocacy, education, and collaboration.

VISION

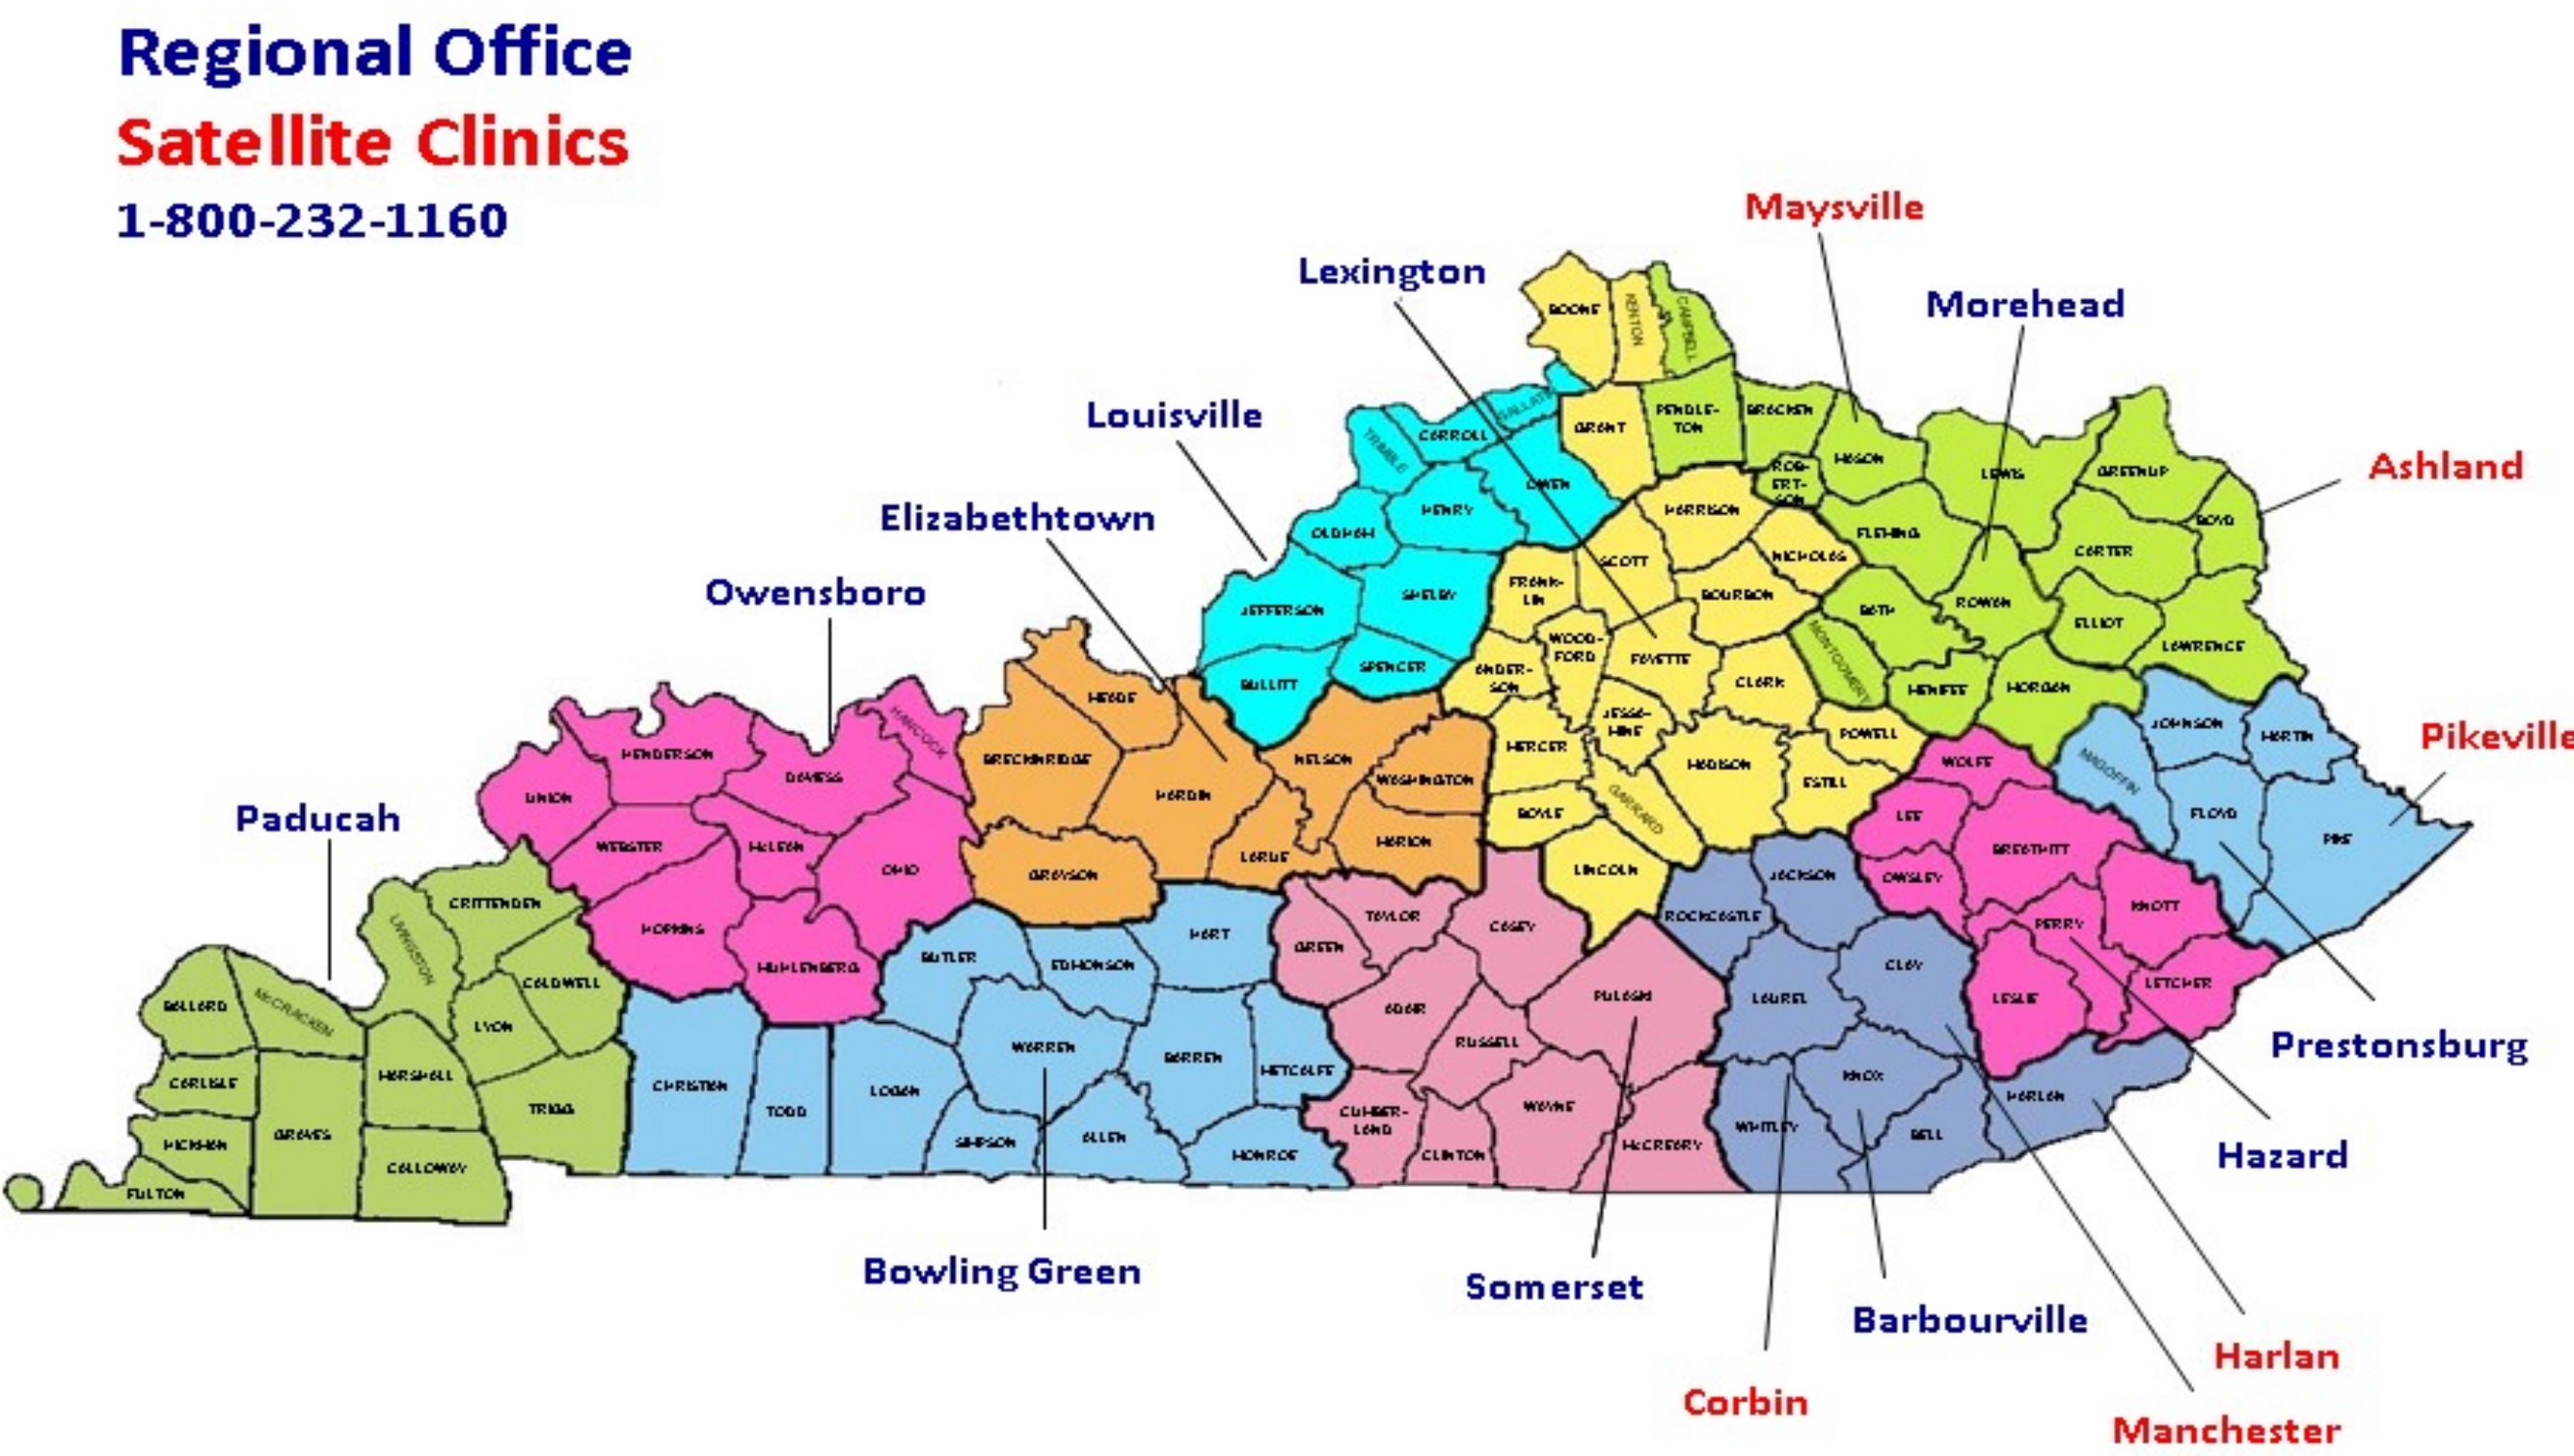

To be the visible leader in supporting the highest quality of life for Kentucky's children with special health care needs and their families through collaboration and creation of a more accessible community based system of support.

WHO WE SERVE

Children and youth enrolled in our program are residents of Kentucky, under the age of 21 (with the exception of adults with hemophilia), meet financial eligibility, and have one of the diagnoses that we treat. Services are provided on a sliding fee scale based on income.

WHERE WE SERVE

OCSHCN has 11 offices and 6 satellite clinic locations across the Commonwealth.

HOW TO APPLY OR REFER FOR SERVICES

Call or fax the office in your area. See pages 14-16 for details.

Audiology Services

Our comprehensive audiological program includes hearing testing, hearing conservation, hearing aid fittings, and programming for cochlear implants. Contact your local office to determine if the service you would like is available in your area.

EARLY HEARING DETECTION AND INTERVENTION (EHDI) PROGRAM

The EHDI program reaches every child in the state, approximately 53,000 babies per year, through newborn hearing screening. Mandated in 2000, hospitals in Kentucky must provide a hearing screen to every child and report all results to OCSHCN. EHDI staff monitors those who do not pass, and those that have risk factors leading to hearing loss. Families receive information on follow-up testing and, if a diagnosis of hearing loss is made, information regarding intervention options and assistive devices.

HEARING TESTING

Licensed, certified audiologists conduct comprehensive hearing evaluations on newborns, infants, children, youth, and young adults including:

- Auditory Brainstem Response(ABR)
- Otoacoustic Emissions (OAE)
- Immittance Measures Tympanometry and Acoustic Reflex Testing
- Behavioral Audiometry (Visual reinforcement; conditioned play; conventional audiometry including speech perception testing.)

Test results and written reports are provided to the referring physician within 48 hours of the scheduled appointment. Follow-up testing is scheduled at the physician's request.

HEARING AID SERVICES

Comprehensive hearing aid related services are available to children diagnosed with permanent childhood hearing loss (PCHL).

Licensed, certified audiologists conduct periodic comprehensive hearing evaluations, hearing aid checks, hearing aid repairs, and hearing aid evaluations according to American Speech-Language Hearing Association (ASHA) best practice guidelines.

Comprehensive reports are provided to the managing otolaryngologist on an on-going basis; additional follow up testing is completed at the physician's request.

HEARING CONSERVATION SERVICES

HEARING CONSERVATION PROGRAMMING SERVICES can be provided to local health and school programs on a statewide basis by OCSHCN audiologists. Specific services provided are: hearing screening training sessions for screeners; training sessions for health department and/or school staff; equipment loan (where available); phone consultations regarding assistive listening systems; assistance in arranging calibration of audiology equipment where OCSHCN offices are used as drop-off sites for calibration; and audiological retesting in OCSHCN offices for children who are referred for failed hearing screening.

Current partnerships include:

- Ashland Independent Schools
- Elliott County Board of Education
- Fayette County Schools
- Floyd County Schools
- Greenup County Schools
- Henderson County Schools
- Lawrence County Schools
- Martin County Schools
- McCreary County Schools
- Muhlenberg County Schools
- Northeast Headstart
- Ohio County Schools
- Pike County Schools
- Russell Independent Schools
- Trimble County Headstart
- Warren County Schools

COCLEAR IMPLANT SERVICES

OCSHCN provides COCHLEAR IMPLANT EVALUATION AND PROGRAMMING services to patients who are currently enrolled in a OCSHCN Otology clinic and meet the guidelines for implantation as prescribed by a staff neuro-otologist. Cochlear implant patients will be followed by the OCSHCN audiologist for initial and follow-up cochlear implant services. Cochlear implant surgery and devices are not provided by OCSHCN.

Clinical Services

OCSHCN clinics offer a family centered, team approach to care, beginning with medical care from pediatric specialists. During each visit, children and families may also receive nutritional services, social services, and occupational, physical, and/or speech therapy.

AUTISM SPECTRUM DISORDER (ASD)	CARDIOLOGY	CEREBRAL PALSY
<p>OCSHCN autism-friendly medical clinics minimize distractions for patients and streamline the clinic experience. Diagnostic clinics provide evaluation for children who may have a disorder on the autism spectrum and assist parents in finding the most appropriate therapies. These clinics fill gaps in parts of the state where diagnosis and treatment resources are scarce.</p> <p>Telemedicine is playing a role by allowing specialists to consult with patients and families while they are seen in clinic.</p> <p>DEVELOPMENTAL SCREENING is available in all locations below and Barbourville (800) 348-4279.</p> <p>DIAGNOSTIC LOCATIONS Somerset(800) 525-4279</p> <p>MEDICAL CLINIC LOCATIONS Bowling Green .. Clinical Services

OCSHCN clinics offer a family centered, team approach to care, beginning with medical care from pediatric specialists. During each visit, children and families may also receive nutritional services, social services, and occupational, physical, and/or speech therapy.

CLEFT LIP AND PALATE & CRANIOFACIAL ANOMALIES

The OCSHCN Cleft Lip and Palate, and Craniofacial Anomaly team was started in the early seventies. Many of the children in clinic have complex genetic conditions requiring several surgeries, numerous specialty trained providers, and years of orthodontic treatment.

A multidisciplinary team is the best way to care for complex patients and help families coordinate care over the years of treatment.

The OCSHCN team meets the high standards of the American Cleft Palate-Craniofacial Association and the Cleft Palate Association. The team consists of:

- Care Coordinator (RN)
- Dentist
- Dietitian
- Family to Family Liaison
- Geneticist
- Oral Maxillofacial Surgeon
- Orthodontist
- Otolaryngologist
- Pediatric Audiologist
- Plastic Surgeon
- Social Worker
- Speech and Language Pathologist

DENTAL & ORTHODONTIA

OCSHCN provides the following services and supplies to children and youth who have received continuous care through one of the OCSHCN Cleft Lip & Palate or Craniofacial Anomalies clinics:

Dental • Prosthodontics • Periodontics • Orthodontics • Endodontics

Clinical Services

OCSHCN clinics offer a family centered, team approach to care, beginning with medical care from pediatric specialists. During each visit, children and families may also receive nutritional services, social services, and occupational, physical, and/or speech therapy.

NEUROLOGY

NEUROLOGY CLINIC

Pediatric Neurology specialty clinics serve children across Kentucky who experience neurological challenges.

Our team of specialists treat disorders that affect the brain, spinal cord, muscles, and nerves throughout the body.

The multidisciplinary team includes nurse care coordinators, social workers, dietitians, Family to Family support parents, and audiologists.

Care is often complicated and our staff are experts in navigating, teaching, referring, and assisting patients and their families to create a plan of care that meets the needs of the child and family.

TELEHEALTH

OCSHCN provides medical care through interactive video communication called “telehealth.” During a telehealth session, the patient is located in an exam room with OCSHCN clinical staff. A OCSHCN physician, nurse practitioner, and/or specialist are in a remote location. Communication is by video. This technology allows patients in rural areas to have access to physicians without travel.

Clinical Services

OCSHCN clinics offer a family centered, team approach to care, beginning with medical care from pediatric specialists. During each visit, children and families may also receive nutritional services, social services, and occupational, physical, and/or speech therapy.

OPHTHALMOLOGY	ORTHOPEDICS
<p>Pediatric Ophthalmology clinic serves children with conditions of the eye. The ophthalmologist diagnoses and treats eye diseases, performs eye surgery, and prescribes and fits eyeglasses and contact lenses to correct vision problems. Our team of nurses assure patient needs are met through education and referrals for needed services.</p> <p>Eyeglasses or eye patches may be purchased for patients who have no other resources to purchase them. Patients must be enrolled in the Ophthalmology Clinic and the OCSHCN staff physician must provide a prescription for glasses.</p> <p>Contacts can be purchased for patients with anotia, microtia, aphakia, or anisometropia with a difference of three (3) diopters or more between eyes.</p> <p>PROVIDER Julia Stevens, MD University of Kentucky</p> <p>LOCATIONS Maysville and Morehead (800) 928-3049</p> <p><i>NOTE: OCSHCN provides financial assistance for families in other locations. Clinical Services

OCSHCN clinics offer a family centered, team approach to care, beginning with medical care from pediatric specialists. During each visit, children and families may also receive nutritional services, social services, and occupational, physical, and/or speech therapy.

OTOLOGY CLINIC

Pediatric Otolaryngology clinics serve children across Kentucky and may be provided at OCSHCN offices or Otolaryngologist offices. Either site provides examination and treatment for chronic diseases and disorders of the ear.

Licensed, certified audiologists conduct comprehensive hearing evaluations and work with families to assure hearing aids and other equipment fit and work properly.

Our team of nurses assure patient and family needs are met through education and referrals for needed services.

Owensboro (877) 687-7038

PROVIDER

Joshua W. Meier, MD

TRANSITIONING TO ADULTHOOD

OCSHCN has a system of care that prepares youth for transitioning into adulthood. Care Coordinators and Social Service Workers work with the youth and their families to:

- Think about and plan for the future
- Make positive choices about health
- Gain skills to manage health care
- Understand the changes in health care at age 18

OCSHCN uses a transition checklist that has age appropriate developmental milestones questions as a

guide when speaking with teens about health care and independent living transition topics. We collaborate with the patient and their family to prepare them to transfer to an adult health care provider. Our Nurse Care Coordinator compiles a Portable Medical Summary that can be shared with the adult provider.

In addition to the transition to an adult provider, OCSHCN works with the youth and his/her family to help the youth prepare to transition to post-secondary education, work, and independent living.

Clinical Services

OCSHCN clinics offer a family centered, team approach to care, beginning with medical care from pediatric specialists. During each visit, children and families may also receive nutritional services, social services, and occupational, physical, and/or speech therapy.

PAYING FOR SERVICES

Insurance Coverage

OCSHCN ensures that families of children and youth with special health care needs have adequate sources of insurance. OCSHCN provides assistance to families with navigating and selecting appropriate insurance. Further, the agency contracts with a trusted nonprofit, Patient Services, Inc., to provide insurance case management and premium assistance solutions for those with bleeding disorders and cystic fibrosis.

Financial Assistance

OCSHCN has onsite clinics that provide treatment for many diagnoses. However, in some cases, a child/youth can be sent to an off-site contracted provider and OCSHCN can help provide financial assistance to cover the cost of services. Currently, financial assistance is provided for the following areas based on the contracted provider's location:

- Asthma/Cystic Fibrosis
- Cardiology
- Eye
- Neurosurgery
- Otology
- Rheumatology
- Spina Bifida

As with the clinical services, a pay category is assigned to the family.

If the family is covered by private insurance and OCSHCN issues an Authorization of Payment for a Clinical Program Service not provided at OCSHCN, the outside provider(who must be contracted with OCSHCN) may collect any applicable insurance co-payment at the time service is delivered and will bill any and all third-party payors before submitting a bill to OCSHCN.

After OCSHCN has paid the provider, OCSHCN will bill the family's portion of the cost, if any, for the service(s) received based on the Pay Category assignment.

Pay Category Assignment

Every individual who makes application for the OCSHCN Clinical Program is assigned a Pay Category. Pay Category placement is determined by applying the individual's household income and family size to a sliding scale which is based on 200% of the Federal Poverty Level. The Pay Categories used by OCSHCN are: 0%, 20%, 40%, 60%, 80% and 100%.

Clinical Services

A clinic participation fee is collected at the time of the clinic visit. The amount is based on the pay category assignment. If enrolled in Medicaid, Medicaid MCO, or KCHIP, there is no participation fee.

Pay Category	Participation Fee (per patient)
0%	\$5.00
20%	\$5.00
40%	\$10.00
60%	\$10.00
80%	\$15.00
100%	\$15.00

Durable Medical Equipment & Hearing Aids

Durable Medical Equipment and Hearing Aids are purchased by OCSHCN at manufacturers rate/cost. Family will be billed based on their pay category and the payment schedules shown at right.

Prescription Drugs (Without Insurance)

Pay Category	Amount Owed
0%	\$0.00
20%	\$20.00 per month
40%	\$40.00 per month
60%	\$60.00 per month
80%	\$80.00 per month
100%	\$100.00 per month

Prescription Drugs (With Insurance)

If a patient is covered by insurance, and is in the 20%-100% Pay Category, OCSHCN will issue a referral for services to the pharmacy. The family must pay the pharmacy directly based on the contract rate with OCSHCN.

In some instances, the drug may be a non-covered benefit according to the insurance company. When this occurs, OCSHCN can cover the cost up front, but will bill the family the full cost based on the payment schedule for the pay category shown below.

Payment Schedule

Following the clinic visit, the patient may require services that are provided outside of OCSHCN. OCSHCN may assist with such services. However, the family will be billed for the costs based on their pay category assignment. They will receive a monthly bill from OCSHCN based on the schedule below.

Pay Category	Amount Owed
0%	\$20.00 per month
20%	\$40.00 per month
40%	\$80.00 per month
60%	\$120.00 per month
80%	\$160.00 per month
100%	\$200.00 per month

Supplemental Services

(Provided along with Clinical Services)

During each clinic visit, children and families meet with a care coordinator. They may also receive nutritional services, social services, and/or therapy services.

CARE MANAGEMENT	NUTRITION	THERAPY
<p>Care Coordination</p> <p>Care Coordination is an active, ongoing process. OCSHCN registered nurses assist and enable patients to obtain family-centered, culturally-sensitive, developmentally-appropriate services. Staff actively engage in a partnership with families and providers to individualize care, provide support, and obtain the best possible outcomes. All patients enrolled in a OCSHCN clinic are assigned a Care Coordinator.</p> <p>Case Management</p> <p>Case Management services may be offered when the needs of the family are beyond that of care coordination. Through case management, a OCSHCN registered nurse works with a family to create the care plan that is right for the child and family. The plan includes the recommendations of doctors and other professionals and respects the needs of the child and family. This service meets the family’s comprehensive health needs through communication and available resources to promote high quality, cost effective services for the child.</p> <p>Social Services</p> <p>OCSHCN social workers play a key role on interdisciplinary teams. These staff members can help children and youth receive maximum benefit from treatment by finding services and resources that can help them overcome barriers to care.</p> <p>Ten of our eleven OCSHCN offices is staffed with a Social Service Worker who meets with families as needs arise.</p>	<p>Healthy Weight</p> <p>As part of the OCSHCN Healthy Weight Plan, we provide nutrition screenings that include height, weight, and calculation of BMI (body mass index). Our staff work with children and youth who are classified as underweight, overweight, or obese.</p> <p>Nutrition consultation can be provided for the following:</p> <ul style="list-style-type: none">• Inadequate or excessive growth• Inadequate dietary intake• Infant feeding problems• Chronic disease requiring nutritional intervention• Medical condition requiring nutritional intervention• Developmental disability <p>In addition, assistance with referrals to other team members or community agencies can be provided.</p> <p>PROVIDERS</p> <p>Meredith Evans, MS, RD, LD Clinical Dietitian</p> <p>Amy Turner, RD, LD Clinical Dietitian</p> <div></div>	<p>OCSHCN has occupational therapy, physical therapy, and speech-language pathology staff housed in our Louisville office. When OCSHCN does not have a therapist staffed in your location, it is our mission to assist families in locating services with a community partner.</p> <p>What are some of the conditions treated by OCSHCN therapists?</p> <ul style="list-style-type: none">• Speech sound and language disorders• Speech and resonance issues associated with cleft lip/palate• Swallowing/feeding issues• Childhood verbal apraxia• Communication delay due to any form of hearing loss• Developmental delays• Gross motor/fine motor issues that interfere with movement/daily living activities• Orthopedic conditions post surgery for upper or lower extremities <p>PROVIDERS</p> <p>LOUISVILLE (800) 232-1160</p> <p>Robyn Schoen, OTR/L Jennifer Ottman, PT Amy Vissing, MS, CCC-SLP</p>

Supplemental Services

(Provided along with Clinical Services)

LANGUAGE INTERPRETATION SERVICES

With a constantly growing diverse population, effective communication is crucial. OCSHCN provides American Sign and spoken language interpreters for parents/guardians and/or OCSHCN patients who are deaf, Hard of Hearing or limited in English proficiency.

By providing this service, we ensure that the parent/guardian/patient, OCSHCN staff and physicians have an opportunity to communicate effectively about all services provided. OCSHCN is mandated to utilize only American Sign Language interpreters that are licensed through the State of Kentucky, as well as spoken language interpreters/agencies that have been qualified according to the Cabinet for Health and Family Services (CHFS) standards. OCSHCN currently provides interpretation for more than 37 languages.

Additional Diagnostic and Treatment Services

FIRST STEPS POINT OF ENTRY

Serving families in Bullitt, Henry, Jefferson, Oldham, Shelby, Spencer, and Trimble counties.

First Steps is Kentucky's Early Intervention System that serves children from birth to age 3 who have a significant developmental delay or a particular medical condition that is known to cause a significant developmental delay.

Early intervention means providing appropriate services and supports to families to enhance children's growth and development.

The First Steps program provides a wide variety of services and supports including:

- Service Coordination
- Evaluation
- Assessment
- Developmental Intervention
- Occupational Therapy
- Physical Therapy
- Speech Therapy
- Audiology Services

HEMOPHILIA TREATMENT CENTERS

The Kentucky Hemophilia Program, administered by OCSHCN, provides ongoing care to children and adults with hemophilia and other rare bleeding disorders.

Currently the Treatment Centers are operated by the University of Kentucky and the University of Louisville.

OCSHCN PROGRAM

Individuals who have no means of paying for treatment, or who require supplemental assistance for bleeding disorder therapies may make full application to OCSHCN for financial assistance and case management of covered services if they have one of the following conditions:

- Hereditary Factor VIII Deficiency
- Hereditary Factor IX Deficiency
- Hereditary Factor XI Deficiency
- Hereditary Deficiency of Other Clotting Factors (I, II, V, VII, X, XII, XIII)
- Von Willebrand's Disease
- Coagulation Defects
- Qualitative Platelet Defects

The social worker at the Treatment Center will assist with referrals to OCSHCN.

FAMILY SUPPORT SERVICES

These services are available to families even if they do not receive clinical services from OCSHCN.

Family to Family Health Information Centers

Family to Family Health Information Centers (F2F HIC) are family-run centers that assist families of children and youth with special health care needs and the professionals who serve them.

The goal of F2F HICs is to help keep children healthy by promoting regular medical care. Parents and families with children who have special health care needs often need help navigating the complicated issues surrounding health care. F2F HICs help families make more informed choices by providing support, information, resources and training. F2F HICs promote access to community based, self-directed services that are available to children with special needs.

The OCSHCN F2F HICs, located at OCSHCN offices, are staffed by support parents (mentors) who are parents of special needs children. A support parent is a person who reduces the feelings of isolation for other families of individuals with special health care needs and allows others to benefit from their experiences. A support parent provides a safe listening environment and a wealth of information to other families.

Case Management

Case Management is available to any family in Kentucky who has a child diagnosed with:

- Asthma/Cystic Fibrosis
- Autism Spectrum Disorder
- Cerebral Palsy
- Cleft Lip and Palate
- Congenital Heart Defects
- Craniofacial Anomalies
- Diabetes
- Epilepsy/Other Nervous System Disorder
- Eye Condition (Medical and Surgical)
- Hearing Loss, Ear Disease and Chronic Eustachian Tube Dysfunction
- Muscle/Ligament/Joint Condition
- Rheumatoid Arthritis
- Scoliosis
- Spina Bifida

Through case management, a OCSHCN registered nurse works with a family to create the care plan that is right for the child and family. The plan includes the recommendations of doctors and other professionals and respects the needs of the child and family. This service meets the family's comprehensive health needs through communication and available resources to promote high quality, cost effective services for the child.

Spanish Speaking Support Groups

OCSHCN partners with University of Louisville Pediatrics, La Casita Center in Louisville, and the Foundation for Latin American and Latina Culture and Arts (FLACA) in Lexington to operate Spanish-speaking support groups. The goal is to increase the knowledge base and comfort level of Spanish-speaking families regarding caring for their special needs child.

Folic Acid Distribution

The OCSHCN Folic Acid Multivitamin program provides vitamin supplements and preconception health education free of charge to any woman of childbearing age (regardless of enrollment status with OCSHCN). Multivitamins are distributed with preconception education in OCSHCN clinical settings and in the community at various outreach events where the target audience may be present.

Folic Acid distribution is a collaboration between OCSHCN and the Department for Public Health.

COLLABORATIONS

OCSHCN is proud to work with professional resources across the Commonwealth to enhance service to children with special health care needs.

FOSTER CARE SUPPORT PROGRAMS

In collaboration with the Department for Community Based Services, the Office for Children with Special Health Care Needs operates two programs specifically developed to support Kentucky's child welfare system.

MEDICALLY COMPLEX FOSTER CARE PROGRAM

The Medically Complex Foster Care Program provides nursing consultation for medically complex children in out of home placements. Registered nurses partner with members of a child's support system to facilitate individualized health plans and conduct monthly home visits to the foster home or other placement setting.

NURSE CONSULTANT FOSTER CARE SUPPORT PROGRAM

The OCSHCN Nurse Consultant Foster Care Support Program includes all children in or at risk for out-of-home-care. OCSHCN offers a nurse consultant in each of the nine DCBS service regions (shown in the map above) to provide consultation to social service workers and foster care families on medical issues. These nurse consultants may interpret medical records and reports, assure updated Medical Passports, enhance care coordination of all services and track the utilization of all health services including prevention and wellness programs.

Contact the Department for Community Based Services Office in your county for further information.
Directory: https://prdweb.chfs.ky.gov/Office_Phone/index.aspx

Or contact the OCSHCN Nurse Consultant Inspector closest to your area. See pages 14-16 for contact information.

PARTNERSHIPS

OCSHCN partners with other providers who serve the children of Kentucky. In some cases, OCSHCN staff may be a supporting partner in their service delivery, offering space to OCSHCN, or utilizing the space and/or technology at a OCSHCN office. Some of our partnerships are with the following:

- Cassidy's Cause Therapeutic Riding Academy
- Community Mental Health Center, Corbin. Virginia Barbosa, MD
- Department for Community Based Services
- Easter Seals Cardinal Hill HorseAbility
- First Steps
- Health First Bluegrass
- Hemophilia Treatment Centers
- Home of the Innocents
- Jefferson County Public Schools
- Kentucky Autism Initiative in Treatment, Training, and Research
- Kentucky Autism Training Center
- Kentucky Birthing Hospitals
- Kentucky Eye Institute
- Kings Daughters Medical Center
- Norton Spina Bifida Clinic
- Ohio Valley Education Cooperative
- Pike County Health Department
- Shriners Hospital, Lexington
- University of Kentucky Pediatric Urology
- University of Louisville MDA Clinic & Pediatric Endocrinology
- Weisskopf Child Evaluation Center
